<https://github.com/tikesh-lilhare>

Aspiring software developer with strong foundations in Java and Python, and hands-on experience in front-end web development using HTML, CSS, JavaScript, and React. Proficient in database management with MySQL and PostgreSQL, and familiar with tools like GitHub, Visual Studio. GATE 2025 qualified with certifications in Java, Python, and front-end development. Known for strong problem-solving, teamwork, and communication skills, with a commitment to continuous learning and growth in software development.

WORK EXPERIENCE

Java Developer intern

Aug 2024 - Sep 2024

Developed a console-based/GUI-based Online Quiz Competition application using Java, allowing users to attempt multiple-choice questions within a time limit. Implemented features such as question navigation, score calculation, timer functionality, and result display. Applied object-oriented programming principles for modular code structure and efficient data handling. Demonstrated proficiency in core Java concepts including classes, arrays, loops, exception handling, and user input management.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

Aug 2021 - Jan 2025

Prof. Ram Meghe Institute of Technology and research

GPA: CGPA: 7.20

HSC

Jan 2021 - Jan 2021

Oasis International School

GPA: 88.50

SSC

Jan 2019 - Jan 2020

Hyacinth's Little Flower High School

GPA: 79.65

SKILLS

Programming Language: Java, Python, HTML, CSS, JavaScript

Technologies: MySQL, PostgreSQL

Development Tools: Microsoft Visual Studio, Github, jupyterlab

Frameworks: React, SpringBoot

Soft Skills: Communication Skills, Problem Solving, Critical thinking, Collaboration and teamwork, Storytelling with data, Presentation skill

CERTIFICATIONS & ACHIVEMENTS

- GATE'2025 QUALIFIED
- Java by carrier ninja
- Python by carrier ninja
- Fron end development by Great Learning

PROJECTS

• Tic Tac Toe Game

Developed a fully interactive browser-based Tic Tac Toe game using HTML for structure, CSS for responsive and engaging UI design, and JavaScript for game logic. Implemented real-time user interaction, win/draw detection, and reset functionality. Enhanced gameplay experience with grid-based styling, turn indicators, and input validation. Demonstrated proficiency in front-end development and dynamic DOM manipulation.

• Music App Homepage

Designed and developed a responsive, visually rich homepage for a music website using HTML for semantic structure and CSS for styling. Implemented sections including a hero banner, navigation bar, featured playlists, artist highlights, and footer, using grid and flexbox layouts for responsiveness. Applied custom typography, hover effects, media queries, and modern UI elements to enhance user experience across devices. Focused on clean, accessible design with SEO-friendly markup, laying the foundation for future dynamic enhancements.
